# DOMINION GBADAMOSI

Ireland | dom1gbadamosi@gmail.com | linkedin.com/in/dominion-gbadamosi | dominion-gbadamosi.xyz | github.com/kiing-dom

### **EDUCATION**

### **University of Limerick**

Sep 2020 - Aug 2024

Bachelor of Science in Computer Science

Limerick, Ireland

• Relevant Coursework: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Deep Learning

## **SKILLS**

**Languages**: Java, Python, Go, JavaScript, TypeScript, SQL, C++, C# **Frameworks**: React.js, Next.js, Angular, Spring Boot, Tailwind CSS

Tools/Technologies: Git, Docker, Jenkins, AWS, Azure, Zustand, JUnit, Figma, MySQL, PostgreSQL, MongoDB, Firebase

Others: RESTful APIs, Agile/Scrum, TDD, Postman

## PROFESSIONAL EXPERIENCE

**Software Engineer** 

Jun 2022 - Dec 2022

General Motors

Limerick, Ireland

- Engineered an on-site seat reservation system using Angular and Spring Boot, boosting office attendance by 30%
- Implemented RESTful APIs, achieving a 40% decrease in API response times, enhancing page load speed and UX by reducing user wait by 25%
- Conducted rigorous software testing and QA to verify performance, slashing post-deployment bug reports by over 10%

# **Software Engineer Tutor**

Apr 2023 - Jun 2024

University of Limerick

Limerick, Ireland

- · Mentored approx. 20 students in critical software engineering topics such as DSA, OOP, and Software Architecture
- Devised and delivered targeted exercises and guidance to enhance algorithmic thinking, resulting in an average grade improvement of 10%

## **Software Engineer Fellow**

Jul 2024 – Sep 2024

Headstarter AI

Remote

- Spearheaded the launch of 5 AI products, using modern technologies like Next.js, leveraging CI/CD practices and acquiring 300+ users
- Led sessions with with an ex-Google Tech Lead and engineers from other major tech companies fostering team collaboration.
- Streamlined API performance on Vercel to handle 1000+ concurrent requests

## **PROJECTS**

# Boxing Nutrition Tracker | React Native, OpenAI, Firebase

Feb 2024 - May 2024

GitHub

- Designed a cross-platform nutrition tracker using React Native, supporting 100+ users, contributing to 2 national titles
- Generated personalized meal plans with OpenAI's API, improving adherence to nutritional guidelines by 30%
- Applied secure user management and efficient data handling with Firebase Authentication and Firestore, achieving a 99% uptime and reducing data retrieval time by 40%

**Educational Streaming Site** | Spring Boot, Spring Security, Java, React, AWS, MySQL

Jul 2024 - Aug 2024

GitHub

- Engineered robust RESTful microservices to manage users and content, streamlining operations, reducing responses by 40%
- Configured Spring Security for role-based access control, securing 18 API endpoints with Cross-Origin Resource Sharing (CORS) and password encryption
- Leveraged AWS services (S3, Elastic Transcoder, CloudFront) for scalable, secure storage, and an increased content delivery speed of 200%

#### **CLI Password Manager** | Python, JSON, Venv

Sep 2024 - Sep 2024

GitHub

- Crafted a secure CLI-based password manager in Python, handling over 100 user credentials with 99.9% accuracy
- Implemented SHA-256 hashing, PBKDF2 key derivation, and Fernet encryption, ensuring data security and reducing unauthorized access risks by 95%
- Integrated core features with JSON based file storage, achieving a 100% success rate in data retrieval and storage
